United States Army Signal Center
and Fort Gordon
Fort Gordon, Georgia*

15 December 2014

Albert J. Myer

BG ALBERT J. MYER

*First Chief Signal Officer, 1860
United States Army*

Robert Donahue

LTG (R) ROBERT DONAHUE

*President
Signal Corps Regimental Association*

Member, Lifetime

Michael J. Danberry has been a member of the Signal Corps Regimental Association since 18 July 2010. He joined while attending the 251A Warrant Officer Basic Course where he reclassified from 915A. Even with Mike's relatively short time in the Signal Corps he has been known throughout the Signal Community since 2007 when he started <https://MilitaryCAC.com> this website has become a "household name" when it comes to troubleshooting personal and government owned computers when people are trying to use their CAC. The site goes much deeper than just CAC install; it includes links for downloading ActivClient, drivers, Antivirus, and Microsoft Office. It has in depth pages of information for Enterprise Email, Evaluation Entry System, and has not left out the Apple Mac users that DoD tends to leave out.

His efforts include thousands of hours creating and maintaining the site, as well as answering support questions from many Service members daily, far above and beyond the call of duty. He has also invested his personal resources to establish the website, no government money has been spent on it. It is by FAR the best repository for all questions from DoD service members issues connecting to the DoD domain and running mission critical admin applications. He is unquestionably the single subject matter expert within DoD on this topic. Chief Danberry's work began to get national attention in 2010. Articles on his accomplishments have been published in Army Knowledge Online (May 2012), Army Times (November 2010), and SecureIDNews (Summer 2012). Other agencies have also recognized his work to include Army Knowledge Online and the Army Chief Information Officer / G6.

Mike also maintains the AKO CAC Reference Center for Army Knowledge Online

Mike recently finished up a successful three year tour as the Chief, Network Operations for the Military Intelligence Readiness Command where he directly supported over 30 administrators and over 6000 Soldiers across the command. He has been the Subject Matter Expert for all things related to Enterprise Email and PIV (Personal Identity Verification) problems, Alternate Smart Card Login (ASCL), and Secure Internet Protocol Routed (SIPR) tokens. He's been an ATC (Army Training Certification) manager and takes every opportunity to share information with his colleagues including the correct process to get Annual Maintenance Fees paid for their Security + CompTIA certifications. Also educates people and shares information for Continuing Professional Education (CPE) which is something that confuses most military IT professionals.

He is willing to stop what he is doing to help anyone in need of assistance. He then takes the time to show what he did providing a learning environment.

Michael has been a participator to the 53List, an email distribution list of over 600+ military, civilian, contractor, retiree IT professionals across the globe since 2003 when he stumbled upon it.
